OBJECTIVE

Motivated and detail-oriented Artificial Intelligence & Machine Learning student seeking an internship opportunity. Eager to apply foundational programming knowledge, collaborate with a team, and develop practical industry skills in a supportive, growth-focused environment.

EDUCATION

Dr RVR NRI UNIVERSITY

Expected Graduation: 2028

B.Tech in Artificial Intelligence & Machine Learning

Score: 91.5%

TECHNICAL SKILLS

- **Programming Languages:** Python (Foundational), Java (Basic)
- **Web Development:** HTML, CSS, JavaScript (Basic)
- **Core Concepts:** Foundational Machine Learning principles, Object-Oriented Programming

PROJECTS

Student Management System

[View on GitHub](#)

- Developed a foundational software application to manage student data and records.
- Applied basic programming principles to ensure data is organized, easily accessible, and efficiently maintained.

Cloud Removal GAN

[View on GitHub](#)

- Explored introductory machine learning concepts by working with Generative Adversarial Networks (GANs).
- Demonstrated an understanding of applying AI models to process and improve image quality by digitally removing cloud cover.

SOFT SKILLS

- **Problem-Solving & Critical Thinking:** Capable of analyzing complex situations, troubleshooting on the fly, and making sound, logical decisions.
- **Teamwork & Collaboration:** Enjoy working well with others, building positive relationships, and resolving challenges constructively.
- **Communication:** Strong ability to convey information clearly, listen actively, and present ideas effectively.

- **Work Ethic & Self-Management:** Committed to showing up consistently, managing time efficiently, and taking initiative on tasks.
- **Adaptability:** Flexible to changes, resilient under pressure, and capable of managing stress while learning new workflows.
